

Me, You, & GOD

BUSINESS REPRESENTATIVE AUTHORIZATION

Complete both pages. Keep a private business copy.

Business legal / official name and trading name (if any)

Official website and country

Representative full name, account email, and requested role: Owner / Manager

Verification request reference

1. Authority and permitted scope

The undersigned confirms that the named representative is an owner or authorized manager of this business and may represent it on Me, You, & GOD. This authorization is limited to that business and the named account; it cannot be transferred to another business or shared account.

Permitted activities include maintaining the business profile, choosing a public contact email with permission, and submitting accurate business information or events through the available site controls. This form does not itself grant a store, payment processing, church publishing, pastor status, or access to another organization.

2. Evidence and independent review

An owner may provide relevant official business-registration evidence or another reliable ownership record. A manager must provide authorization from the owner or the business governing authority. The site owner reviews the claimed authority independently before assigning a verified role. A form, account selection, or signature alone does not establish verification.

Provide only the relevant evidence. Redact unrelated home addresses, government-ID numbers, financial records, and other people's personal information. Do not provide identity scans, biometric material, or passwords. Arrange private submission with meyouandgod@inyourlanecustoms.com using the request reference. Do not publish evidence in profiles, posts, or publicly shared folders.

Me, You, & GOD

BUSINESS REPRESENTATIVE AUTHORIZATION

Complete both pages. Keep a private business copy.

3. Responsibilities and removal

Use your own verified account and protect its credentials. Obtain permission to publish names, logos, images, contact details, and event information. Keep information accurate, follow community rules, and promptly report loss of authority or suspected account misuse.

The business owner or governing authority may request revocation of a manager's authorization. The site owner may suspend or revoke the role after review or in response to suspected misuse. A verified business role is not a guarantee of event safety or approval of products, licensing, legal compliance, or transactions.

4. Private records and site status

Supporting authority evidence and this completed form are retained in the restricted Business Verification folder in private Drive. The site stores the account-linked role, organization, decision status, review date, and private archive reference needed to administer access. Supporting title evidence is not uploaded through the verification request page.

Website copies of existing uploaded authorization documents may be removed only after the site owner opens and compares the archived Drive copy and confirms restricted access. Drive archiving is currently a manual process. Deleting a public profile revokes the associated site role but does not automatically erase separately retained records. Retention or deletion requests are reviewed according to the necessary purpose and applicable rights.

5. Signatures

Business owner / governing authority: I confirm my authority to authorize this representative.

Representative: I confirm the information and accept the responsibilities above. We understand the private record process and will keep a copy.

Owner / governing authority name, title, signature, and date

Named representative signature and date (an owner applying personally signs both lines)

6. Private site-owner review record

Reviewer / date / private Drive reference

Role approved: Owner / Manager. Activation requires the site owner's recorded approval for the matching organization and verified account. Review this template under the business's governance and applicable law before use.
